

Shivalik Public School

Mohali, Punjab, India

Construction and installation of a multi-sports surface

Date of Project Completion: February 2016

Base Construction: Plain Cement Concrete

Surface/s: Tournament

Shivalik Public School, Punjab is amongst the most premier institutions in the state. The management of the school wanted to provide "the citizens of tomorrow" a world-class, outdoor facility ideal for sport and recreational activities that also helps in their all-round development.

TigerTurf's Tournament withstands heavy use in variable conditions, providing a high standard of performance throughout the seasons, over many years, offering great value for schools. Needless to say, this facility requires little maintenance, has excellent playing characteristics and requires no water.

Further, the durable nature of the grass ensures that recreational activities and a variety of other sports can also be played on this surface without any risk to the product or the athlete. The surface is unique and multifaceted compared to most products. What is more, this versatile surface is also used for track events, hockey, netball, and handball.

This installation has brought many smiles on the faces of the students and has also reenergized their spirits for they finally have a cushioned, all-weather surface to play on as compared to the hard surface that they had previously been playing on.

"Shivalik Public School is proud of the multi-sport facility that has been established by Altius Sports. We are full of appreciation for their utmost professionalism and their ability to perform according to the requirements," said Mr. D. S Bedi, the director the school.

At Altius, we call this the *love of the sport*.
