FIH Gobal Certified Hockey Ground

Design, manufacture, full-build and installation of hockey ground

Date of Project Completion: May 2011

Surface : FIH Global Category TT37 with cast in situ shock pad

Base Construction: Asphalt

The client's vision for the project was to provide a world-class playing surface for hockey in a safe environment for amateur and professional players.

With the installation of TigerTurf, the unkempt hockey ground gave way to a two-tone synthetic turf that was consistent in its playing characteristics and helped hone and nurture talent and develop the skill of the players.

An unusual yet interesting fact about the facility was that animal pug marks were found every time the team returned to the site during the laying of the cast in situ shock pad. The entire area had to be cordoned off and kept under security but even then these 'intrusions' never stopped.

Despite the minor hiccups, the installation was completed before time and this is now the premier hockey playing facility in Jalandhar.
