

American Embassy School

New Delhi, India

Football

Full build, manufacture and installation of a Football/Softball/Multi-use all-weather pitch for the American Embassy School; the first artificial football pitch in New Delhi.

Date of Project Completion: August 2012

Surface: Endurance 50 with TPE infill over a 10mm Shock Pad

Base Construction: Dynamic Base

The American Embassy School (AES) in New Delhi is a highly regarded International School participating in comprehensive inter-school sports competition with schools in India and Middle East.

The school wanted to provide its students with a sporting facility predominantly for football but also used for softball, general athletics, PE classes as well as an area for cultural events.

A key consideration for the school was how to mitigate the effects of both the high temperatures (the temperature in New Delhi can reach close to 50°C) and the high intensity rainfall experienced during the monsoon season.

After a lengthy consultation process with the AES, Altius Sports & TigerTurf were given the go-ahead in February 2012 to build and install its Endurance 50 all-weather surfaces highly durable synthetic system with the lowest possible heat reflection and using TPE as infill rather than the conventional SBR found in most football fields.

The 1st truly green football field in India, using natural rubber as infill; as shock-pad for player comfort and safety; and a yarn with unlimited play warranty.
