

Amazon Development Centre

Hyderabad, Telangana

Supply & installation of TigerTurf landscape turf

Project completion: August, 2020

Product: TigerTurf Panorama 35

Surface: Concrete

The largest always wants the best and the case was no different when it came to Amazon. This "green area" was sprawled across 15,500 sqft and though the installation looks simple, it was a daunting task given the contour, shape and elevation, not to mention the extraordinary times that the world was witnessing, and our first tryst with lockdown.

This Amazon Skyscraper, as it is so called houses more than 15,000 employees and is the first Amazon owned office building outside the United States. With 49 elevators that move a floor per second, these elevators can move 972 people simultaneously.

A beautiful and authentic alternative to dry climate natural grass, Panorama incorporates several shades of green yarns with a mix of

brown yarns at the root to give it a realistic look and feel of natural turf. Our landscape turf is certified to European EN71-3* standards – safe as a toy.

TigerTurf landscape range does away with the need for watering, mowing or allergy-causing seeds and remains lush & green 365 days a year no matter the weather. The product is UV stabilized & free of harmful material and perfect for even low light & areas.

Convert your dull areas into natural looking greens – be it the corners or shadow areas, roof top or awnings – our landscape turf, that requires virtually no maintenance, can bring the duller of areas into life. Come feel the magic with our landscape range of TigerTurf.
