

Chennai International Airport

Chennai, Tamil Nadu

A landscaping project for passenger baggage terminal area

Date of project completion: April, 2023

Surface: TigerTurf Harmony Lite 30

Chennai International Airport is the 3rd largest airport in India after Mumbai and Delhi. It is located in Tirusulam, around 20 km (12 mi) southwest of the city centre. The Airport consists of 4 Terminals T1, T2, T3 and T4 where T1 and T4 handle domestic arrivals and departures, whilst T2 and T3 (under construction) handle international arrivals and departures.

Recently, the international terminal was extended further west by adding a new block which includes three aero-bridges. At present, the new international block (Terminal 4) is used for departures while the older Anna Terminal (Terminal 3) is used for arrivals. Altius Sports has left its footprint in this newly made Terminal 4, and how!

Our team installed TigerTurf Harmony Lite 30 on the landing area between the conveyor belts making this space come alive, looking like a freshly mowed, natural lawn 24 x 7. This dense yarn will stand the test of time and will remain de-lusted so that it doesn't shine in your eyes and gives that natural, appealing and relaxed look – no matter the time of day. Certified across continents in terms of being "truly green" be it US Pro 65/European Reach standards, this soft, lush, appealing turf is also EN71-3 certified – safe as a toy.

And it wasn't just the product, but also the skill of the installation team, especially when it comes to seams and pile direction for this meticulously installation is such that you cannot discern whether it is grass or TigerTurf!
