

Private Residence

Kolkata, WB

Supply and installation of TigerTurf landscape turf along with shock-cum-drain pad

Date of project completion: December, 2022

Surface:TigerTurf Sierra 35 & TigerTurf Sine pad

Base construction: Concrete

Altius Sports has successfully installed landscape turf in prestigious projects all over India. Here, we showcase a project that has given us yet another chance to show our excellence and creativity in the landscape genre.

In this project, Altius Sports has left its unique footprint on each floor of this private residence by offering different landscaping designs across the various floors.

TigerTurf Sierra 35 was the choice here and laid on a TigerTurf Sine Pad. Naturally, our TenCate yarn is certified across continents in terms of being "truly green" be it US Pro 65 or European Reach standards. This soft, lush, appealing turf is also EN71-3 certified – which means safe as a toy and great for kids and pets alike.

The turf is UV stabilised, thus ensuring your lawn will look lush, green and last for years and years. This green with beige thatched means that this product gives a realistic impression of recently mowed, fresh grass always. And what is more – no watering, mowing or weeding required.

The landscape turf was installed on a TigerTurf Sine Pad. This ensures both shock-absorption as well as fantastic drainage. It provides a comfortable, cushioning surface making it easier on joints and muscles and helps reduce wear on the back of the tufts of the carpet – thus increasing the wear and longevity of the turf itself. With the added drainage feature, you never need to give the turf a moment's rest and can enjoy the outdoors indoors, 24 x 7, 365 days a year. With TigerTurf landscape, the grass is actually greener where you stand!
