Mumbai

Design, supply & installation of TigerTurf for futsal & cricket

Project completion: June 2021

Base: Dynamic stone base

Surface: XP Pro 40 (FIFA, FIH Multisport)
& Premier

An outdoor venue within the school premises near Jogeshwari railway station, for futsal & cricket combined. The facility is called JES Academy. It is a 16,000 sqft. community space that is developed to provide a lifestyle to the youth of today and it offers both co-learning and co-playing facilities. The idea behind the venture was to create a venue where grassroots sports is given prime importance.

"We wanted to set up a premium sporting turf where our major offering would be a complete experience. Altius Sports looked promising from the very beginning about product quality and service and our experience with Altius Sports was smooth and satisfactory for they were responsible and prompt to complete installation even during the difficult months of the unfortunate Corona virus outbreak".

"Using the turf has been a brilliant experience for the clients as well as for me personally, and, as I am an ardent cricket enthusiast and

play almost every day for a couple of hours myself, I would personally recommend TigerTurf from Altius Sports".

TigerTurf's Atomic Pro products have been developed as a result of years of research to replicate the characteristics of natural grass while enhancing player performance and safety. These unique fibres have been developed in the shape of a diamond and with a thickness of 365 microns, it can withstand frequent use for many years to come. This system provides the ultimate combination of advanced performance and durability with a natural visual appeal.

TigerTurf Premier uses a fibrillated, polyethylene yarn and allows players to develop their skills on a true surface with realistic turn and bounce. It is an extremely hard-wearing turf and is meant for both indoor and outdoor use. It is easy to install and provides a levelled playing surface. TigerTurf Premier surfaces are also fire rated for indoor practice areas (if partially infilled with sand).
