

Kalpataru Grandeur

Indore

Mini sport along with fencing and netting

Date of Project Completion : August 2019

Base Construction : Concrete

Surface : TigerTurf Volley Pro

No real estate project or apartment complex is really complete without a play area and for a surface that is safe, secure and enduring, you need not look further than TigerTurf.

The Kalpataru Group was founded in 1969 and has amongst the finest projects in their portfolio. In 1970 the tallest tower in the city of Mumbai was built by them and they were also the ones who built Asia's first and the world's sixth platinum LEEDS certified commercial building.

Volley Pro is a short pile polyethylene surface requiring no infill. It is ideal for both indoor and outdoor use and replicates a highly maintained grass court with an all year-round option.

The yarn is a texturized monofilament polyethylene yarn and

uses a woven polypropylene with polyester weft and a non-woven fleece layer for its backing along with a concentrated latex compound for superior tuft lock.

The product is a non-infill one, with a dense machine gauge of 4.7mm and is direct stuck on the base, making it secure and prevents any movement of the product upon the base that could lead to any risk hazard.

Altius Sports ensured a timely completion of perhaps amongst the finest multi-sport product that has years and years of enduring use. The client appreciated our entire approach to this project from inception to handover and moreover, they were "extremely happy with the ball bounce and cushioning of this ITF 5 certified TigerTurf."
