

Kanakia Rainforest

Mumbai

Mini tennis court along with fencing, netting and lights

Date of Project Completion : April 2019

Surface : TigerTurf Premier

Base Construction : Concrete

In every real estate project, no apartment complex is complete without recreational facilities. And this holds true, even if the area in question is small. With nearly 2,000 residents and with a product for daily use, the answer was easily TigerTurf.

The Kanakia Group, established in 1986, has developed over 14.6 million sq. ft. of commercial & residential space including their foray into the development of entertainment, educational and industrial spaces as well.

Naturally, with a host of awards won by the real estate developer, they couldn't compromise on quality or workmanship and Altius Sports was the natural answer for this turnkey project including the illumination of the entire play area. TigerTurf Premier is a short pile turf, that is heavy metal free and

UV stable. It is a 100% polypropylene fibrillated product and uses a superbond latex compound for turf backing and superior tuft lock.

The product is a non-infill one, with a dense machine gauge of 4.7mm and is directly stuck on the base, making it secure and prevents any movement of the product upon the base that could lead to any risk hazard.

The entire project was completed on time, adhering to the highest quality standards and norms and we are very pleased to share the feedback, as received from the client and the residents, that they are "extremely happy about the workmanship of Altius Sports and it is money well spent."
