

# Paro Futsal Court

Bhutan

Futsal field for practising & coaching of club members

**Date of Project Completion** : August 2019

**Base Construction** : Dynamic porous base  
(crushed rock)

**Surface** : TigerTurf Atomic Pro 40 along with fencing,  
netting & lighting

Paro FC was awarded the Asian Football Confederation (AFC) Special Grassroots Award 2019 in the category of the outstanding work by a club in Grassroots Football development and this was possible because of some very fundamental factors, two of them being their full-sized TigerTurf football field, and, most recently, their 6-a-side TigerTurf football field.

Using a crushed rock base, this futsal facility was installed in cold temperatures using our unique Atomic Pro yarn that boasts the highest combination of wear (cycles on the Lisport machine) and thickness (in microns of the yarn) when it comes to monofilament yarns that our FIFA approved.

This facility is primarily for use at the grassroots level and for budding athletes to practice and train on. Considering its

ribbed surface diamond shape, this artificial turf is ultra-durable and gives high performance despite rigorous use. Furthermore, locals can enjoy a game here as well as the facility being open to residents of Tashi Namgay Resort.

Altius Sports has been a natural choice not only for turf but also a preferred choice for all futsal venue owners who are looking at maximising playtime with minimum downtime without losing the professional experience. In the words of Mr Jigme Karma, president Paro FC, Bhutan and also the proud owner of this magnificent facility "I personally thank Altius Sports for giving a high-quality FIFA standard artificial turf with great workmanship where future champions are getting trained".
