## Supply and Installation of synthetic turf for futsal field

**Project completion:** July, 2019

**Base:** Cement

**Surface:** TigerTurf Atomic Pro 40 (FIFA Quality, FIFA Quality Pro, FIH Multi-sport Category 5)

This futsal pay & play venue was constructed inside the campus of a junior school – Little Learners – owned by Mr Niraj Periwal. The feedback of the high quality of turf was such, that line marking for cricket and badminton were also added so that the surface evolved from football to multi-sport. This facility is now used not only by the school children and other sports' enthusiasts, but coaching classes for football and badminton are also held here.

TigerTurf's Atomic Pro products have been developed as a result of years of research to replicate the characteristics of natural grass while enhancing player performance and safety. These unique fibres have been developed in the shape of a diamond and with a thickness of 365 microns, it can withstand frequent use for many

years to come. This system provides the ultimate combination of advanced performance and durability with a natural visual appeal.

If you are looking for superior ball roll or better resilience, then the Atomic Pro series is your best option. Not only that, the glare on the turf is also reduced as it disperses light reflection and is the ideal surface for high performance sports fields.

In the words of Mr Niraj Periwal – "TigerTurf was chosen above all because of the quality of turf being supplied and the feedback of other users who encouraged to go for this turf. Also, the quality assurance up to 7 years was an add-on". Here is to our love of the sport.
