

Allahabad University – J K Institute

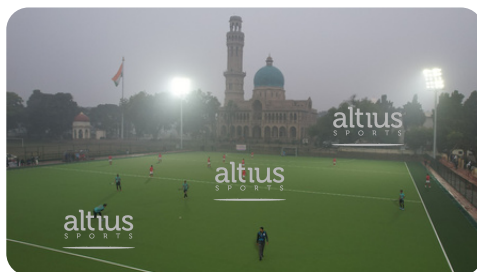

Prayagraj, Uttar Pradesh

A complete turnkey solution for FIH certified a full-size hockey field with lighting, all ancillary works, including beautification & changing rooms

Year of project completion: 2023

Surface: TigerTurf Wett Pro

Base construction: Asphalt

Established in 1956, J.K. Institute of Applied Physics and Technology (JKIAPT) is a highly reputed institute in India and is located in Prayagraj (Allahabad). J.K. Institute stands as a beacon of academic brilliance in the realm of technical education and has a rich history of nurturing talented minds, fostering innovation and propelling India's technological advancement.

We were entrusted the task of not just designing the field, but also the light rendering – which meant manufacture and erection of light poles and installation of light fixtures – and beautification of the surrounding area, which also included aspects of horticulture and water bodies.

TigerTurf Wett Pro is made of a unique texturized monofilament yarn that ensures a grain-free playing surface. This implies that the ball and stick travel smoothly in all directions. The hockey turf is trip glued on to the pad, and not loose laid, which means there are no bubbles or wrinkles on the playing surface.

What is more, the top of the D us tufted into the turf during manufacturing, which means that the most critical and exciting area on the field does not see any unnecessary seam movement!

Tested to FIH Global standards from FIH Preferred Supplier TigerTurf and the entire turnkey project executed by Altius Sports, an FIH certified Field Builder, this is a true testimony to our love of the sport.
