Date of Project Completion : December 2019

Base Construction : Concrete

Surface TigerTurf Atomic Pro 40

The client had a previously installed turf that went to smithereens in less than 2 years of use. Fed up with complaints and the low quality products being passed off as football turf in the market and understanding the need for quality workmanship and a product that is backed by rigorous R&D and a rich heritage, he looked no further than TenCate-TigerTurf-Altius Sports combine – a collective legacy of over 400 years!

The need to remain physically active is an emerging factor in ensuring a healthy lifestyle in today's world. People want to indulge their skills and interact with nature and what better way to do so than playing a sport – for this brings entertainment, team-work and bonding to the fore.

Atomic Pro uses yarn technology to provide the ultimate combination of advanced performance and durability. The fibre has been developed keeping in mind the many fields exposed

to constant wear. Its ribbed surface diamond shape makes for the most advanced ultra-durable, grass fibre within its respective market segment with resilience, increased comfort and safety as prime attributes.

The Atomic Pro series are not just certified for FIFA Quality & FIFA Quality Pro, but also as FIH Multisport. With its rigorous testing by certified laboratories under the most stringent of conditions, this product is brilliant for both the player and the owner of the facility. A 100% polyethylene monofilament with excellent mechanical tuft lock, Atomic Pro is indeed a great product.

This entire process of making functional this world-class turf took a total of 3 days only much to the delight of the venue owner as well as the multitude of youngsters and aged alike and people from all walks of life who could not play on an enduring, safe and certified turf system.
