

Ford Motor Private Ltd

Chennai

A complete turnkey project from design to base construction to supply, install and multiple play elements along with tensile roofing, lights & play equipment.

Project completion: August, 2022

Base: Plain cement concrete

Surface: TigerTurf Panorama 35, EPDM (both over a 25mm cast in situ shock pad)

LIFE or, as we call it, Learning In Fun Environment, is what this unique play area is all about. We had to make it exciting, we had to make it inviting, and we wanted it be both safe and durable. So the design team decided to give multiple elements that would blend seamlessly into an exhilarating playground.

TigerTurf Panorama 35, certified to EN71-3*, or literally, safe as a toy, was the preferred surface for the “greens.” UV stabilised, glare-free and both child and pet friendly. This unique turf remains green all-year round without the need for watering or mowing and is lush 365 days a year. To make it adhere to critical fall heights, it was laid over a 25mm cast in situ shock pad – after all, safety is paramount.

EPDM was laid in colour to add to the design element and same was broadcast again on a cast in situ shock pad so that cushioning remained constant and trips and falls were a thing of the past. A sand pit along with the vibrant colours made the design even more exciting, creating an entire “playing habitat” for the children.

To complete the magic, a host of playing equipment was installed and this, over our surface with a shock absorbing shock pad, made the entire play zone cushioned and impact free. The tensile roofing, with its unique design, keeps the sun out, yet lets the light in. And for the evenings, the lights banish the darkness for an all-round, fun and scintillating experience.
