

Air Force Station - Nagpur

Nagpur, Maharashtra

Supply and installation of Australian made acrylic surface for tennis

Date of project completion: December, 2025

Surface: Acrylic Advantage System

Base construction: Asphalt

The Air Force Station at Nagpur is one of the key operational and logistics establishments of the Indian Air Force in Central India. Strategically located in Nagpur, Maharashtra, the station plays a vital role in supporting air operations, communication networks and training activities across the region. Known for its high standards of discipline, precision and professionalism, the base ensures seamless coordination for various IAF missions and contributes significantly to national security.

Our team has recently completed two, full-sized tennis courts on an asphalt surface, using the advanced 9-layer acrylic system from Laykold – the official surface supplier of the US Open, manufactured in Australia. This premium system includes one coat of primer, two coats of resurfacer, four coats of cushion and two coats of colour, ensuring superior playability, durability and performance.

Following the successful completion of this project, we have already commenced another assignment under a different regiment of the Air Force namely, the Air Force Station at Pune. Over the years, we have had the privilege of executing numerous sports infrastructure projects for multiple Air Force stations and this is a testament to our long-standing association with the Indian Air Force.

The client was extremely satisfied with our workmanship and professionalism. While signing the completion certificate, they went the extra mile to provide a handwritten testimonial appreciating our efforts. Their feedback read: "Work has been completed by your team with fully professional manner".

Here's to our love of the sport!
