

# Mahabaleshwar Landscape Project

Mahabaleshwar, Maharashtra

## Supply and installation of TigerTurf Landscape turf on hill top

**Date of project completion:** November, 2023

**Base:** Concrete

**Surface:** TigerTurf Serenity 30

Mahabaleshwar, a hill station in India's forested Western Ghats' range south of Mumbai, is known for its elevated viewing points like Arthur's Seat. The farmhouse situated in this scenic location now boasts a pleasing, serene and lush lawn, thanks to the installation of TigerTurf landscape turf.

This project once again provided us with the perfect opportunity to showcase our proficiency and ingenuity as perhaps the only infrastructure company in the Indian landscape turf domain. The project was delivered by our in-house team as they handled the entire design process, meticulously planning two distinct zones to be covered in lush, vibrant "green." The team ensured that the installation was executed flawlessly, resulting in a garden and children's play area on the hilltop farmhouse that looks lush and manicured, regardless of the season.

TigerTurf Serenity 30 is an authentic alternative to dry climate and truly mimics natural grass. Manufactured using our TigerCool, TenCate yarn, Serenity is cooler than most synthetic grasses by up to 15%. It is visually stunning, creating outdoor spaces that are realistic, comfortable and EN71-3 certified – implying that there is no risk to young or old, children or pets. TigerTurf Serenity has the added benefit of being olive green in colour, thus replicating a natural lawn and it is also de-lusted so that you do not get that shiny, "plastic" look. A stunning alternative to natural grass, Serenity feels soft under foot and the best in class when it comes to landscape turf.

In this project, our team has once again demonstrated their expertise in installation. The garden where the turf was installed was a sloped plateau and the installation carefully accommodated the trees as well.

When ever you think green, think TigerTurf.
